

WORLD'S WEEK

By Harold L. Welz
Assoc. Editor, The Edmonton Bulletin

The war has definitely passed into a new phase of higher tempo. All the millions of German and British troops which for months have been waiting in state of static position are now slowly being moved, according to all indications, into active operations.

No matter to which the action develops, victory may fall in the Balkans or in Africa, or in the Italian theatre, of war, it is inconceivable that the action should bog down into stalemate as it did when the Italians were the sole combatants, in those areas, on the enemy side.

The very fact that the Germans have considered the African and Balkan fronts worthy of their personal attention shows that they will continue the battle in that country.

If the Germans lose in Africa and the Near East, they cannot afford to lose prestige by accepting and swallowing defeat. They will have to fight on.

If the Germans win in Africa and the Near East, they cannot afford to only be the bases for an extended period of aggression.

I have contended for some weeks that the real targets for Nazi acquisition in these theatres of war were not Greece and Norway, but Iraq and even Egypt, but the oil fields of Iraq and the rich wheat lands of the Ukraine. Present strategists seem to bear out this contention.

Whatever happens, they will eventually make a drive through Turkey and Syria into Iraq and through Rumania into the Ukraine, for these places are where war lost will be the richest.

The eastern front will likely engage millions of fighting men before war is over.

But if hostilities show signs of expanding in intensity and activity, they show no less unending signs of expanding geographically.

As the eastern front absorbs more and more of Hitler's reserve forces now stationed in Germany and France the fluidity of his movement between Great Britain and the continent will be increased.

British raids into Europe will be undertaken, experimentally at first, by mechanized troops as well as airmen. Already a few of these raids, with extremely mobile motorcycle cavalry, have taken place.

The more German intention becomes coupled with eastern objectives—for once having tanks held, Hitler cannot let go—the more will these British raids increase in frequency, volume and extent.

WORK OF RE-BUILDING NO. NINE HIGHWAY TO START EARLY IN MAY

Will Raise Road Above
Height of the Land

Work of rebuilding and resurfacing No. 9 Highway from Langdon corner to Drumheller will commence early next month after a survey is completed by government engineers, according to a news report in The Drumheller Mail.

Gordon Taylor, M.L.A., just returned from the session at Edmonton, states that money has been provided and the road will be fixed immediately.

The highway will be rebuilt so that the surface of the road is higher than any of the surrounding country, and then will be well gravelled.

It is highly doubtful at the present time, that the road from Drumheller to Hanna will be rebuilt.

CANADA NOW PRODUCES MUCH ARMY EQUIPMENT

Sufficient Lee Enfield rifles for use in Canada, Bren guns adequate for the Active Army and training centres, Canada, machine guns to equip every machine gun battalion in the field on the basis of the present establishment and field artillery to equip the 3rd and 4th Divisions are now available, according to a statement by the Hon. J. L. Ralston, Minister of National Defence in the House of Commons on March 11st.

Anti-tank rifles are in process of production, and gun barrels of anti-tank rifles are being produced.

As the eastern front absorbs more and more of Hitler's reserve forces now stationed in Germany and France the fluidity of his movement between Great Britain and the continent will be increased.

British raids into Europe will be undertaken, experimentally at first, by mechanized troops as well as airmen. Already a few of these raids, with extremely mobile motorcycle cavalry, have taken place.

The more German intention becomes coupled with eastern objectives—for once having tanks held, Hitler cannot let go—the more will these British raids increase in frequency, volume and extent.

WORDS OF INSPIRATION

Thought A Day
For A People At War

"Farmers and workers cannot remain passive in the struggle. Within the British democratic system they have a chance to achieve a better life and greater prosperity, to struggle by legal means for their rights and to work toward the creation of a new society of toilers, without exploitation and force." — U.K. rainier weekly, Winnipeg.

WM. ROSS ELECTED PRESIDENT OF TENNIS CLUB FOR YEAR 1941

Fees Reduced This
Year to \$3 and \$2

The annual general meeting of the Carbon Tennis Club held its 31st annual meeting on Saturday, April 22nd, when the following officers were elected:

Honorary President: S.J. Garrett.
Honorary Vice-President: C.H. Nash.
President: Wm. F. Ross.
Vice-President: Norman E. Ross.
Secretary: W.A. Braisher.
Treasurer: J.V. Harvey.
Team Captain: Cyril Poxon.
Executive Committee: W. Ross, N.E. Nash, W.A. Braisher, V. Harvey, C. Poxon and H. Larsen.

It was decided to again affiliate with the Alberta Lawn Tennis Association.

The balance sheet was read, showing that all accounts had been paid, and there was a balance on hand of \$100.

It was decided to reduce the fees this year, these being set at \$3.00 for regular members and \$2.00 for junior players.

Junior players have the use of the court free with net and tapes, providing they maintain it, and senior players are allowed to instruct and coach junior players on the senior court; providing such was not required by senior members.

The date for the annual dance was set for May 23rd, and the following Committee was appointed to make all arrangements: C. H. Nash, W. Ross and C. Poxon.

THE WORLD OF WHEAT REVIEWED WEEKLY BY MAJOR H.G.L. STRANGE

Some 1100 Crop Correspondents of the Seattle Grain Company recently made an estimate of the wheat acreage that was sown this last year with seed treated respectively with formalin or with mercurial dust, or of that which was untreated. The results vary somewhat for each province, but taking the Prairie Provinces as a whole the Correspondents' estimates show that 54 per cent of the wheat sown last year was treated with formalin, 31 per cent with mercurial dust and 15 per cent was either treated with other compounds or was untreated.

The percentages will no doubt be about the same for this coming spring. A word of caution, therefore, about the use of these seed treatments may be in order.

Formalin is the cheapest treatment but has the defect that if the solution used is too strong, germination may be seriously affected. Farmers, therefore, should make their formalin solution of exactly the strength recommended by the manufacturers.

Mercurial dust has the advantage that it cannot harm the seed and also that it prevents to some extent damage from root rots and wire worms.

The disadvantages of mercurial dust is that it is more expensive than formalin, and because it is a poison, that it requires extreme care to be taken in its use in order to avoid harm to persons treating the seed, and harm to farm animals should the latter eat any of the treated seed.

BUY WAR SAVING CERTIFICATES

LONG YEARS AGO

April 24, 1898

"Jake" Ohlhauer has secured the Watkins route for this district.

H.A. English has resigned his position as manager of the Carbon yard of Imperial Building Supplies, and expects to leave soon with his family to visit at the coast.

"Safety First", a 3-act play, will be staged at Carbon May 1st.

Grade V School Report—Billy Ohlman, Fergus Greenman, Jim Hunt, George Jealous, Bill Graham.

Grade IV School Report—Roy James, Marjorie Martin, Agnes Sherry, Sydney Bramley, Edith, Winnie Diezler, Esther Ohlhauer.

WAR SAVINGS CERTIFICATES HAVE BEEN BOUGHT IN LARGE VOLUME

Purchasers Exceed
Gov't Expectations

Officials at Ottawa are expressing pleasure over the results thus far of the War Savings movement in Canada. During the month of March the amount of cash actually received by the Bank of Canada for War Savings Certificates was \$10,053,780.00, an amount greater than the monthly objective set before the February drive was undertaken.

The interesting point in connection with this announcement is that this on million dollars does not reflect the full result of the February drive. Hundreds of thousands of industrial employees who have signed a war savings pledge had not had their cash remittances sent to Ottawa before the end of March. Their participation will be properly reflected in the April total.

And the cash take for the month of April is expected to be much more than ten million dollars.

The Hon. J.L. Balsey, Minister of Finance, in commenting upon the results, said, "Although the volume for the month of March is gratifying, it must be remembered that our problem was of war finance is a very heavy one and I am confident that the Canadian people will respond with ever increasing purchases of War Savings Certificates."

In a statement prepared by the War Savings Committee recently tabled by the Minister of Finance, it was stated that the promotional and sales expenses up to the end of 1940, excluding costs of registration fees of the Bank of Canada, were equivalent to 1.1 per cent of Certificate and Stamp sales to that date. Based on these expenses and sale price of Certificates to the public, the average actual cost of registration fees in the War Savings movement was 2.18 per cent of sales to that date.

Based on the cost of money to be borrowed through the sale of War Savings Certificates in 1941, the War Savings Committee has estimated that the important social and economic implications of the War Savings movement and the costs of other methods of public financing.

CARBON AND DISTRICT NEWS NOTES

Mr. and Mrs. H.L. Laughlin have returned from the Pacific coast.

Mr. and Mrs. Tambley and Edna of Calgary visited in Carbon Sunday.

Mr. and Mrs. B.C. Downey.

Mr. and Mrs. Herbert Reinhardt of Edmonton have moved into the Sayler house. Mr. Reinhardt is the new mechanic at Garrett Motors.

Mr. and Mrs. Jim Hunt moved last week to the home recently vacated by the Royal Family.

School re-opened Monday after the Easter recess. Mr. Larsen, teacher of Room III is absent for a while, we understand putting in the crop on his father's farm in the south country, and Mrs. Vyriling Moorhouse is relieving as teacher for this month.

Mr. and Mrs. Jas. Smith and Roy returned Sunday after spending the past couple of weeks at Vernon and Kelowna, B.C.

The Misses Elaine and Marion Torrance and Lorraine Downey, and Francis Poxon returned to Carbon Sunday to resume their studies. Mr. and Mrs. Torrance took them in Sunday.

Miss Mona McKibbin returned Sunday after spending a week visiting in Calgary with Mr. and Mrs. Bruce Hamasy.

Const. and Mrs. Amy and daughter, and Robert Phillips motored to Calgary Saturday, Robert returning to the city after spending a week in Carbon.

The van finally arrived Tuesday to move Rev. and Mrs. Evans to Brooks, and they left that afternoon for their new home.

Mr. L. Brooks returned to Calgary last Thursday after spending a week in Carbon with her sister, Mrs. M.J. Elliott.

Seeding is getting into full swing now on many farms and given ideal weather it won't be long before the wheat is all sown. Harvesting is interfering with seeding operations on many farms, and combines have been working this week, cleaning up last year's crop. What came through the winter fairly well, with No. 4 grade predominating.

CARBON JUNIOR W.A. MEMBERS ATTEND CALGARY RALLY

On Friday, April 19th, the following members of the Carbon Junior W.A. met in the program, playing the hymn, "We Love the Land O' God" on the hand bells, for which they were heartily applauded.

Following the luncheon, the children's Service and the reading of the annual report, the local girls took part in the program, playing the hymn, "We Love the Land O' God" on the hand bells, for which they were heartily applauded.

PROVINCIAL RANKING FOR LOCAL TENNIS STARS

Francis Poxon and Miss Annie Le-may of Carbon both received provincial ranking from the Alberta Lawn Tennis Association this year. Francis was ranked eighth in the Men's, and Annie was placed sixth in the Women's.

This is the first occasion that a Carbon lady has received Provincial ranking, and it is an unusual honor for a county player, most of the ranking players being from Calgary and Edmonton.

WEDDINGS

SINCLAIR—BURTON

A quiet wedding took place on Saturday, April 12, at St. Magdalen's Anglican church, Drumheller, when Pte. Lawrence H. Sinclair, formerly of Michichi, and Winnifred Burton, only daughter of Mr. and Mrs. H. Burton of Drumheller (formerly of Carbon) were united in marriage.

The bride wore a blue and rose ensemble with blue accessories and a coronet of tea roses. Eva W. Sinclair of Michichi acted as bride's maid, and the groom was supported by Wallace Burton, brother of the bride.

Rev. John H. Taylor was the officiating clergyman.

It is reported that T.J. King is quite ill at his home north of Carbon.

WAR SERVICES DRIVE FAR FROM COMPLETED AT THIS LATE DATE

Many Local Canvassers
Have Not Reported

The drive in Carbon district for the War Services Fund is far from complete at this late date, partially due to bad roads this spring, and the oncoming harvest and seeding operations all at one time. Country canvassers and many of the town canvassers have not yet reported, although it is known many have collected fair sums, but no official report has been made by them. The committee asks those canvassers who have not reported, to do so immediately.

Actual receipts to date are only \$283.65, with only town canvassers reporting, and the amount should be much higher when final returns are made.

The War Services Fund provides money for a worthy cause, and everyone should make an effort to donate to the cause.

CARBON AND DISTRICT NEWS NOTES

Archie McLeod is having the post office given the once over, with Dick Heath as chief painter and decorator.

Bob Hay arrived Friday from Carbon and is visiting with Mr. and Mrs. S.F. Torrance.

—The Intermediate C.G.I.T. will hold a 3-act play, "Look Who's Here" and a "Quiz" in the Farmers Ex. Hall, Carbon, on Friday, April 25th, at 8.00 p.m. Admission 35c and 25c.

Ross Thorburn brought in a saddle pony last week from the farm and is "just keeping in practice." He says it's just like doing time in the saddle.

Salvaging To Serve

Canada's latest war effort is one to which practically every person in the country can make some contribution, no matter how poor he or she may be. Every home of a household, every housewife and even most of the youth of the Dominion can assist this effort in some form or another and thus play a part in helping to win the war and bring it to a successful conclusion at an earlier date than the realization of the enemy.

Reference is made to the campaign recently launched on a national and organized scale to collect throughout the length and breadth of the land waste material, which would otherwise be allowed to rust or rot, to gather it together and deliver it at a central collection depot where it can be shipped to factories and workshops for processing and conversion into weapons, munitions and materials to be used in the great task of ridding the world of Nazism and its evil influence.

This is a magnificent effort in the battle for freedom in which practically every rural and urban resident of the country can freely participate and at very little cost with the exception of the expenditure of some time and energy, and yet it is an effort which can and will play a highly important role in the prosecution of the great adventure to which the people of Canada have committed themselves.

There is no farm in Western Canada which does not harbor its quota of obsolete machinery, abandoned implements, waste iron and scrap metal of all kinds which have accumulated during the pioneer days and have been added to during the later expansion period. In every town and village similar accumulations of discarded waste materials are to be found lying on vacant lots, behind barns and shops and outbuildings.

There are few attics and basements in villages and towns and on the farms which could not contribute materials, which would never otherwise be used, yet, if rescued, would form a valuable contribution to the task in hand, to which we have pledged our money and our energies, our time and our talents to the utmost limit.

Materials In Abundance

And what are these materials which are now being so eagerly sought as weapons in our fight against Hitler and his Nazi hordes? They are scrap iron and steel non-ferrous metals, rags and films, waste paper, bottle caps, tin foil and cullet, the last-mentioned being the trade name for bottles and glass, and other materials which Canadians waste to the tune of millions of dollars annually.

And what is going to be done with these materials, once they have been salvaged and transported into position where they can be converted into materials of direct and indirect use in the war effort? At the processing points waste materials are to be turned into iron, steel, aluminum, tin pots and pans will be used in the manufacture of aeroplane parts, scrap iron will be converted into shrapnel, bones will become glycerine for high explosives, and glue, and other materials, when processed, will appear in other forms of war materials. For example, the waste of film is needed for the manufacture of bags to replace jute from Calcutta which is now difficult to obtain because ocean boats are more urgently needed for other war requirements.

With the application of scientific methods to industry in more recent years, supplemented by the discovery of new and more scientific processes, it is surprising the number of valuable uses to which waste materials can be put today, and their value is further enhanced by the fact that they are materials and the increasing needs of these materials in the war economy. Many, no doubt, would be surprised to hear that about ten pounds of tin foil, an amount which would hardly appear to be of great value, could sell for sufficient money to buy a cannone of two 3.7 anti-aircraft shells, enough, if properly placed, to bring down two Nazi bombers plying their nefarious business of shelling innocent women and children over an English town. Right tone of scrap iron lying around the fields and machine sheds of many Canadian farms will sell for enough money to buy a 500-pound motor to drop on Berlin or to put a Nazi submarine or cruiser out of commission.

A Job For All

Working through the National Salvage organization in Ottawa, many local committees have already been set up and are at work. In many other districts committees are now being set up or will be in the immediate future and no time should be lost until it will be possible to say that no community however remote or obscure, is not at work combining its area for every pound of material that can be converted to the prosecution of the war or can be sold for materials needed to prosecute the war.

The modus operandi is perfectly simple. It is to secure waste materials free, to secure salvage yards for collection, sorting such materials free and to gather and sort waste material by voluntary organization.

Here is an opportunity for practically everybody to make a small but needed contribution to the war effort and, once accumulated hordes of past years have been disposed of, the effort for the duration of the war can be by saving and contributing such materials as they come to hand, as soon as sufficient quantities for economic handling can be made available.

Was Famous War Horse

Veteran of First Great War Had To Be Destroyed

A famous veteran of the first great war, Lord Mottistone's horse "Warrior," has been destroyed because of failing health. It was drowned at London. The 22-year-old "Warrior" had so many escapes from death that the men of the Canadian cavalry Lord Mottistone commanded in France called him "the hero who the Germans can't kill."

Four months of incessant bombing did not prevent the annual performance of Handel's Messiah by the Royal Choral Society of London, which took place in Queen's Hall, fortunately so far undamaged, before a capacity audience.

The expression "fit to be a" refers to the T-square or rule used by carpenters when exactitude is required.

According to a Russian scientist the human eye moves involuntarily about 100 times a minute.

LOOK OUT FOR YOUR LIVER

Back it up right now

and feel like a million

Your liver is the largest organ in your body and most important to your health. It keeps you able to digest food, gets rid of waste, and stores new energy, shows proper material to reach your blood. When your liver gets out of order food decomposes in your intestines. You have become constipated, drowsy, and feel like a million.

work properly. You feel rotten!—lethargic, tired, slow, dragged out all day.

For over 25 years thousands have been helped from these ailments—by Fruit-A-Tive.

See your doctor. Try Fruit-A-Tive. You will be surprised how quickly you will feel like a million again—happy and well.

Secret Was Discovered

Scientists Found Why Certain Brand Of Flour Sold Well

According to Marketing, Toronto, a flour miller was unable to get his share of business in the coal regions of Pennsylvania. A consulting engineer was asked to see what he could do. He went to the territory and spent a month talking to grocers, watching miners' wives buy, even calling on them in their homes. English is strange enough in that locality, so he hired a social worker who spoke several languages. Day after day she and the consultant went the rounds of miners' cabins, ostensibly making a dietetic check-up, explains advertising and S. Selling. They learned that one brand of flour was getting most of the sales. Three days later the social worker did a lot of talking in Polish. The mother of the family laughed and brought out several pieces of children's underwear made of the competitor's flour sacks. The social worker made several of these material; the thirty women were buying flour in sacks which could be made into underwear.

A New Game

Goal Ball Is Intended To Be Played In Community Halls

Primarily intended for a game to be played in community halls or rooms with low ceilings and giving opportunity for basketball practice as well as entertainment, an arrangement of some of the usual basketball, hockey and other rules made its appearance in the Young Women's Christian Association gymnasium in Edmonton, Alberta, a few nights ago, when the Bissell girls basketball club played an exhibition game.

Any school or athletic club possessing a basketball and the securing of a few sticks and nails to construct goals might be interested in writing to the Bissell girls' club in Edmonton and ask for a copy of the printed rules of the game.

Copy Was Too Good

Japanese Are Great At Imitation

The Windsor Star gives us this story: So faithfully do the Japanese copy goods, they sometimes make an error in judgment. Take the case of a playing card company. The firm makes ordinary playing cards and also puts a card in each pack advertising a better grade of cards.

The Japs bought some of the ordinary cards to use as models and copied the cards to the most minute detail and flooded the United States with the cheap decks. But here is where the playing card company had a laugh. Each pack of Japanese cards contained a card advertising the product of the American company.

Foremost has been added to the French food ration list. Other meats have been rationed for months.

Two chess players, one in Nottingham, England, and the other in the U.S., have been carrying on a game by post for the past four years.

His sugar supply greatly reduced in Germany, occupation Norway's aculeators are speculating on getting 600,000 tons of sugar annually from wood pulp.

A ministry of overseas trade, to handle all responsibility for British imports and exports was suggested at the annual meeting of the Institute of Export.

Total dollar value of Canada's retail trade in 1940 was \$2,729,000,000, an increase of 12 per cent over the 1939 figure of \$2,417,608,000, the Dominion bureau of statistics reports.

At its golden jubilee meeting at Calgary the Canadian Horsefodder Breeders' Association elected Lieut. Col. F. E. Birdsell, of Birdsall, Ont., president.

An Italian announcement asserted one of the parachutists landed by Britain in southern Italy in February was shot in the back by a firing squad as a traitor after he was identified as an Italian citizen.

Approval by army authorities of the enlistment of non-enemy aliens caused a rush to recruiting depots in Australia. Thousands, most of them Poles, Turks and Greeks, came from all states of the commonwealth to enlist.

He said four things constituted his life. Children, flowers, birds and music. That was his motto.

"Where it not for these four things about me, I would have no desire to live," he stated.

"When I die I will die a poor man financially, but rich in friends. Some men can count their money, but I cannot count my friends."

"Were it not for my friends I could not have carried on and my bird sanctuary, the newspaper editors who have so wholeheartedly backed me up and caused others to create bird sanctuaries, and the radio that carries the news of my life."

Speaking of the bird sanctuary system of protecting birds, he said: "A bird sanctuary takes nothing from any one. On the contrary, it increases the chances of the 90 per cent, who do not shoot, of seeing a bird alive. It increases the hunter's chances of getting a full game bag, not only for this generation, but for generations to come."

Among the honors to come to Jack Miner in 1941 was that the press of the land proclaimed him "the best known citizen in Canada and the fifth best known in the U.S.A."

Mr. J. D. Fraser, chairman of the Dominion Publicity Bureau has proclaimed him a "National Benefactor."

Although he has celebrated his 70th birthday, yet he was recently made president of the Essex County Tourist Association in this capacity he is giving his time and influence in trying to bring citizens of the United States into Canada with the tourist money at a time when this Dominion so badly needs it.

Against The Law
It is slanderous to call any one in Britain a "Quisling."

William Hewitt, an army officer, was awarded £100 (£445) damages against Thomas Thorne, who had so called him.

The court ruled that to say a man was a "Quisling" was to accuse him of being disloyal.

Viktor Quisling, Norwegian Nazi leader, was the leading traitor to his country at the time of the German invasion a year ago.

Motor bus and truck services are available in North China by a Chinese railway company are said to exceed 6,000 miles.

One In A Million

Ontario Man Gave Editor Bonus After Paying His Subscription

The Winchester, Ont., Press says: The other day one of our subscribers walked into the office and threw down a two-dollar bill. We reached for our mailing list to mark up his renewal, when he said: "That's not for my subscription, it's paid in advance. That money is for you, I appreciate the paper, I enjoy your editorials. I want to show my gratitude in some way, so put that money in your pocket. He would take no refusal, we had to keep the money—so we invested it in War Savings stamps. That man is one in a million; his subscription paid and he gives the editor a \$2 bonus. When we think of some subscribers who will not even pay their subscriptions without several reminders, well . . .

Rich in Friends
Jack Miner, Canadian Naturalist, Celebrates His 70th Birthday

Surrounded by several newspaper reporters and photographers, he said, "The biggest bank account I ever had was in my pocket."

Bankers have carried me all my life so no doubt they would like to be my pallothers and be glad to carry me the rest of the way."

He said four things constituted his life. Children, flowers, birds and music. That was his motto.

"Where it not for these four things about me, I would have no desire to live," he stated.

"When I die I will die a poor man financially, but rich in friends. Some men can count their money, but I cannot count my friends."

Gardening

A few special implements will make gardening more interesting and less arduous. These are not expensive. For ordinary digging both a spade and a digging fork are needed. The first is ideal for turning over soil in the spring or for breaking up sod. The fork, lighter and easier to operate, excels in cultivating any soil that has been plowed or spaded sometime earlier. For killing weeds, thinning, cultivating large vegetables and shrubbery, a small, not-too-wide, hoe well sharpened is the ideal tool.

The Dutch Hoe

For working under shrubbery and around small bedding plants, such as newly set out petunias, asters, cabbage, etc., a Dutch hoe is ideal. This is a U-shaped affair and is pushed along just under the surface of the soil. It cuts off any weeds and leaves the soil broken and crumbly. For routine cultivation some sort of a three to five-pronged cultivator is recommended. The larger of these are dragged along rows and between plants. They have long handles, and about a dollar for working in among closely set flowers, shorter-handled smaller cultivators can be used.

To Prevent Jowlers

One can do wonders with flowers alone, but still more amazing results can be achieved by using flowers skilfully with grass, winding walls, shrubbery and bits of stone-work. In this combining, however, we must take care not to reproduce a jungle. A little preliminary planning and a rough sketch drawn beforehand is essential to make well deserved. Flowers and shrubbery must not be so crowded that they become spindly and weak.

Little wonders must not be hidden by tall things like full asters or corns or zinnias. Beds must be so arranged that we can see down weeds and remove fading foliage. Above all we must remember that plants are very selfish. It is best to use a fair amount of lawn as a foreground for our flower beds. Lawns are almost vital in creating garden pictures.

Feed The Lawn

This lawn badly mixed with weeds almost invariably have poor soil. Sometimes only a liberal application of commercial fertilizer or well rotted manure is necessary to restore rich greenness. Well fed, well watered grass will usually crowd out weeds, though it will appreciate some help from the gardener who does not mind spending a few hours with a sharp weeder.

Determined To Be Free

Yugoslavia Would Rather Die Than Give In To Nazis

The love of freedom has compelled a nation of 16,000,000 to defy a nation of 80,000,000. The determination to be free has caused a people or rather three peoples—to overthrow their own Government because it did not match that determination.

A passion for independence which the Nazis thought to exploit to keep the Yugoslavs divided into Serb, Croat and Slovene, has welded Yugoslavia a kind of unity not known in Europe since the days of the Yugoslav statehood—Christian-Slavic Monitor.

Good Conduct Expected

"Especially good conduct" is expected of German citizens in the court of sentencing two Frenchmen to death for robbery of a German tourist.

After the Frenchman was taken to Paris as factory workers. They were said to have robbed a German during the blackout.

TOTS' DRESS-UP OR PLAY MODE

By Anne Adams

Fashion has no age limits—not even an entrancing style like Pattern 4720 is especially designed for little as can be two-to-ten girls.

The Anne Adams pattern-fabric is gay and novel as can be, yet it is so simple to cut and sew that even a child can follow the front skirt, just below that unexpected point of the waist—seam—so smart! Then, see the nicely curved side bodice sections. The sleeves may be wing-like flares in crisp folds. For a dress-up style of sheer flowered fabric, see on a pert blouse and lace edging. To make a more everyday version of cotton or rayon, use buttons and a matching or contrasting collar. If your fabric is striped, you might let the centre bodice section be on the cross-grain, for striking effect.

Pattern 4720 is available in children's sizes 2-4, 5 and 10. Size 6 takes 2 yards 3 1/2 inch fabric and 1/2 yard contrast.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg, New Brunswick, Union 175, McDermott Ave. E., Winnipeg.

Bel Rings Despute Law
People living near St. Barnabas Church in Eltham, England, were surprised to hear the church bell ringing on an afternoon in 1940, despite Britain's order against the tolling of the bells. The bell was muffled, but could be heard. It was rung during the institution and induction by the Bishop of Southwark of a new vicar.

Another thing that comes out of the mouths of babes is sleepless nights.

In Brazil loud motor horns are banned at all times, and the use of any horn between 10 p.m. and 7 a.m.

The city of Omsk, Siberia, following the example of Peter the Great, has imposed a tax on beads.

When Death Won The Race

Currently Unobtainable In London And Price Has Gone Up

Anything which sheds a momentary gleam of humor as relief from the tragedy of war is welcome. Such is the recent dispatch from London telling of the frantic searching for pins by some How families. Such is said to be the driving behind the cracks of their floor boards, where pins may have fallen in better days, for the little implements to hold suits together while they are being fitted on British forms. Pins are currently unobtainable in London.

Troubles of the London tailors appear to result from exhaustion of their stock. The December issue of rationed pins was but a fraction of the previous month. This has sent the price of pins soaring from nine cents to 20 cents a box. The makers of London may have to fall back on the prehistoric pin, which was a thorn from the nearest bush that held together the skin suits of the cave men.

WHEN DEATH WON THE RACE

SUNDAY SCHOOL LESSON

APRIL 20

USING WITNESSING POWER

Golden text. They were all filled with the Holy Spirit, and they spoke the word of God with boldness. Acts 4:13.

Lesson: Acts 2:14, 33. Devotional reading: Matthew 10: 16-22.

Explanations and Comments

The Coming of the Promised Power, Acts 2:1-12. On the day of Pentecost something extraordinary happened. Something came which could only be described by figures of speech borrowed from the natural elements.

There was a sound as of wind and an appearance as of fire, symbols of the Holy Spirit promised to Christ's disciples. The disciples found themselves praising God in words that sounded strange in their ears, but which Jews from everywhere understood and at which they marveled.

The symbols that were like wind and like fire disappeared after a time; the accompanying gift of "speaking with tongues" was also not to be. The Spirit's presence was abiding, and it was a reality that could not be taken away.

Peter and John Arrested, Acts 3: 17. The great gathering in Solomon's Porch of the temple drew the attention of the captain of the temple and the Sadducees. They were offended at Peter's preaching and at his proclamation of immortality, and in proclaiming the doctrine, Peter was arrested.

The two apostles, and because it was evening time for the guards to close the temple gates and to take them out of the temple, they were kept for the night. The first of the long line of persecutions was begun.

Peter's Boldness Before the Sanhedrin, Acts 4:1-12. On the following day Peter and John were brought before the Sanhedrin, that great Jewish tribunal. Annas and Caiaphas, Alexander and other great officials were present. The man whom Peter had healed was also there, as a kind of accessory to the "good deed."

"By what power and in what name have ye done this?" they demanded. Then Peter, filled with the Holy Spirit, and given to use the opportunity, thus answered him, answered boldly: "Ye rulers of the people (the chief priests) and elders (representatives of the Sanhedrin), if we this day are examined concerning a good deed done to an impotent man, what do ye mean this man is made whole (if we are forced like criminals to defend ourselves from doing good)."

He was not alone in his answer. He knew unto you all, and to all the people of Israel, that in the name of Jesus Christ of Nazareth, whom ye crucified, whom God raised from the dead, even in him doth this man stand before you whole."

Thus Peter answered their question, and with superb daring accused them of the crime of having put to death the Lord's Anointed. It was a very risky thing of having him to do. He might have been punished with death.

Advice Worth Following

A committee on cereal varieties has made recommendations for the prairie provinces. Their work has been to get ten varieties of hard red spring wheat into the district best adapted to them. This official advice is well worth following unless there is some local condition that makes a different choice advisable.

Recent shipments of wool to the United States were the first from New Zealand to a neutral country since the war began in September, 1939.

An American newsmen back from the European continent says the Nazi hate to be hated. And the rest of the world hates to hate them—but they can't help it.

WHEN DEATH WON THE RACE

Currently Unobtainable In London And Price Has Gone Up

Anything which sheds a momentary gleam of humor as relief from the tragedy of war is welcome. Such is the recent dispatch from London telling of the frantic searching for pins by some How families. WAR ORDERS CANADA REACHING A HIGH FIGURE

Ottawa.—The munitions and supply department celebrated its first birthday, and its orders, placed for the Canadian and British governments, now have reached \$1,000,000,000.

"Purchases are growing so rapidly they are soon expected to reach \$5,000,000 a day," the department said in a "birthday review" of operations.

Some 1,600 men and women are responsible for department operations under Munitions Minister Howe. A year ago 300 persons were employed in the department. Since then, the department statement said, it entered into the making of the tools of war with vigor and speed.

Domestic demands were related to second place. War orders were given the right-of-way.

Washing machine factories started to turn out fusils, fabric and garment plant turned to making shells, clothing factories concentrated on battle dress, an elevator company began making gun barrels.

The department gave these facts in its review of various phases of its operations during the year.

Construction workers tackled a \$110,000,000 defence building program for industry and army forces they put up nearly 27,000 buildings and constructed 106 air fields; outfit for plant extension and construction now at about \$300,000,000.

The new plant program for manufacture of chemicals, for example, embraces some 19 projects and an expenditure of about \$110,000,000. Five major and 27 minor projects are either producing or about to do so.

The shipbuilding program, involving an expenditure of \$120,000,000, is summarized as follows: corvettes, 80 ordered, 47 launched; minisubmersibles, 10 ordered, 15 launched; auxiliary cruisers, three ordered and delivered; vessels converted to naval use, 27 ordered and delivered; also ordered are 24 patrol boats, 12 special minisubmersibles, and 20 cargo ships; deliveries are being made constantly under the \$6,000,000 small boat program, which include the construction of hundreds of craft ranging from purifiers to motor torpedo boats. A total of 100,000 motor vehicles have been ordered by Canada and other empire countries and more than 100,000 have been delivered.

In two recent consecutive weeks, Canadian airplanes have been ordered more than 40 planes per week. Since the beginning of the war some 1,300 aircraft have been built in Canada, and several hundred imported planes have been assembled.

In the past 12 months orders for clothing for the services totalled approximately \$58,100,000; for foodstuffs, \$14,500,000; for medical and dental supplies, altogether \$1,000,000.

Total armament orders run into hundreds of millions of dollars. Canadian plants now are producing Bren guns, two types of anti-aircraft carriers, and armor plate. Tens of millions of rounds of small arms ammunition are being produced monthly, and nine types of gun ammunition are being manufactured at the rate of millions of rounds a day.

"Shortly," said the department, "Canada will produce her first tanks and 25-pounder field guns. Work is in progress looking to the later production of complete anti-aircraft guns and carriages, and three types of artillery guns and batteries."

Tens of millions of dollars in intensive orders also have been placed for four types of naval guns, depth charges, anti-tank mines, rifle grenades and mortars are on order."

Complaint From Japan

Newspaper Claims Axis Pact Offers No Protection Against Russia

London.—The Japanese newspaper Hochi complained that the triple pact does not offer Japan sufficient guarantees against Soviet Russia.

"We cannot blindfold our backs to the three-power pact which the Soviet Union still menaces the rear of Japan," the newspaper said in an article quoted by the British Broadcasting Corporation.

"It is unreasonable," the newspaper continued, "that Japan should be constantly menaced by the Soviet Union so that her advance northward is being threatened, while Germany—another signatory to the pact—has concluded a non-aggression pact and an economic agreement with Russia."

The Canadian Navy

Is Giving Good Account Of Itself On All Seas
Toronto.—Navy Minister Angus L. Macdonald, in an account of the far-ranging activities of the Royal Canadian Navy, declared that two more enemy merchant vessels had been sent to the bottom as a result of the watchfulness of a Canadian auxiliary cruiser.

In an address to the Canadian Club of Toronto which he said "there is not a sea in the world where Canadian ships or sailors are not seen," he told of the action of the cruiser which he later confirmed as the Prince Henry.

He said the cruiser had caught up with the enemy ships and they, "in the good German way, scuttled themselves." Canadian sailors aboard the Prince Henry were unable to extinguish the fire set by the German mariners and the vessels were sunk.

He reviewed the growth of the Canadian navy from 1909 when, he said, Canadian naval policy had its origin, until the present time when the navy consists of 17,000 officers and men and 107 ships. He said present plans call for 31,000 officers and men by March 31, 1942, and that 100 ships will be in service by then.

He praised sailors from Canada's western provinces who, "in a splendid account of themselves," when placed aboard ship.

Balkan Invasion

Lord Halifax Says Yugoslavia Forced Hitler's Hand

London.—British Ambassador Lord Halifax calls Adolf Hitler's action in invading Yugoslavia and Greece "nothing but violent theft and murder."

Halifax believes that Yugoslavia's defiance of the Axis forced Hitler into war against himself. But the British ambassador says that the Yugoslav resistance to Axis demands put Britain and her Allies on what he calls "the threshold of great events."

Or Italy, Halifax says Benito Mussolini has been forced to choose between what he calls "the threshold of great events" or what he calls "the threshold of great events."

But Italy, Halifax says Benito Mussolini has been forced to choose between what he calls "the threshold of great events" or what he calls "the threshold of great events."

Halifax says that the remedy is not to destroy the German people themselves, but for all people who love peace to become so closely related to the German people that war is out of the question for 600 years. The British view's thoughts were expressed in a speech before the National Women's Press Club.

Mexico Seizes Vessels

Government Expropriates Twelve German And Italian Ships

Mexico City.—President Canchazo announced today that Mexico had seized 12 German and Italian merchant ships taken in custody by the Mexican navy and the Mexican Coast Guard. The president ordered the ministry of the navy to place crews aboard the 10 Italian and two German ships immediately so that Mexico could use them in coastwise and international trade without delay.

Under the decree, settlement of claims against the expropriations would be deferred until the end of the war.

The president ordered Foreign Minister Padilla to notify the German and Italian ministers immediately.

This action quickly followed Mexico's flat rejection of those minister's offer of immediate surrender of the seized ships.

Mounties Get More Pay

House Of Commons Makes Announcement Of Well-Desired Increase

Ottawa.—Justice Minister Lapointe announced an increase in pay for personnel of the Royal Canadian Mounted Police.

The increases, dating from April 1, 1941, range from 50 cents a day for constables and corporals, 75 cents a day for sergeants and staff sergeants, to \$1.25 a day for assistant commissioners.

Constables now receive up to \$2.25 a day.

The announcement was made in the House of Commons where, some weeks ago, there was a general expression by all parties that the R.C.M.P. receive increases and members applauded the news.

Danish Ships

Washington.—President Roosevelt asserted he would ask congress for legislation under which Danish ships in American ports would be purchased by the United States government.

Grateful To News Services

Secretary Of U.S. Navy Was Given Co-operation He Requested

Washington.—Col. Frank Knox, secretary of the United States navy, issued for publication the following statement:

"I wish to commend the action of the press association, newspaper, broadcasting companies, and photographic agencies who have co-operated at my request in not reporting the recent arrival of a British warship in this country."

The issue-end it makes the United States a repair base for British war vessels. It is true that many people can see these ships as they arrive and depart and before they are swallowed up in navy yards. It is also true that enemy agents can report these movements; but it seems to me only sportsmanship that the keen American press refrained from giving a report of these ships for the benefit of Britain's enemies. At the present time this sort of reporting is of inestimable military value to the Germans."

SHIPPING LOSSES IN RECENT WEEKS HEAVIEST OF YEAR

London.—Failure of overseas ships to turn up sent British and neutral shipping losses for two of the past five weeks to approximately 150,000 tons—the biggest loss of any week this year. For the week ended March 16, 10,000 tons were lost. The average weekly loss of shipping during March was placed by the admiralty at 80,000 tons.

Amended losses for the week ended March 2 listed 30 ships totalling 150,700 tons—the biggest loss of any week this year. For the week ended March 16, 10,000 tons were lost.

Losses declined during the week ended March 23 to 17 ships aggregating 59,414 tons, the admiralty reported, and went up again, the following week to 20 ships of 77,755 tons.

The breakdown of losses for the week ending March 30: British, 19 ships, 58,870 tons; Allied, five ships, 14,975 tons, and neutrals, two ships, 5,750 tons. In the same week, the Axis claimed 109,000 tons sunk, the admiralty said.

The low figures for the week ended March 16 already had been mentioned once—from 23 ships to 27 and from 71,773 tons to 94,402.

In the same week, an authoritative source declared the Battle of the Atlantic "may well be the result of the war." The source said the battle "must continue over a period of months with considerable sacrifice and endurance by merchant seamen and the Royal Navy" and added "we must not underestimate this immensely difficult problem."

It was announced that the average weekly shipping toll since the start of the war, excluding the losses at Dunkirk, was 66,743 tons, and the weekly average for February 85,000 tons.

An admiralty statement said Britain had conveyed 200,000,000 gross tons of shipping since the start of the war. The greater part of this tonnage," the statement said, "arrived unscathed by the enemy."

CHILDREN'S HOUR IN "HELL'S CORNER"

Although it has been dubbed "Hell-Fire Corner," because of the almost constant drubbing by air bombs and long range artillery shells from across the channel, England's Dover is still home to these children. Many have been evacuated, but the great majority remain at home with their folks. These kiddies are now war-wise. They know just when to duck.

Help To Break Monotony

Canadian Troops Welcomed Nazi Air Forays Over Iceland

Ottawa.—Spasmoidic German air forays over Iceland serve only to "hasten the monotony" for Canadian troops there, Lt.-Col. G. Harold Rogers related in a letter read to Ottawa Rotary club.

Col. Rogers, who commands an Ottawa unit in Iceland, said German planes had made "a couple of visits" to the island on occasion the roar of a Nazi machine was believed killed.

He said the troops welcomed these "visits" and were hoping for a "return engagement."

CALL IS ISSUED FOR MORE MEN FOR ARMED FORCES

Ottawa.—A call for upwards of 116,000 men to reinforce the armed forces, it was announced in a joint radio appeal for recruits by the minister of defence, Mr. James D. Macpherson, and Navy Minister Macdonald.

The manpower required during 1941, the army will absorb up to 72,000, the air force approximately 35,000 and the navy plans about 9,000 officers and men the minister announced.

Launching the first public appeal for recruits since the outbreak of the war, the minister said the shortage of men in the armed forces had created an impression that men were not needed.

Under present conditions, the army alone would require between 5,000 to 6,000 every month for active service, and up to 10,000 for reserve units already formed or to be added to them.

Col. Ralston said members of reserve units would first be called upon to volunteer for active service as the need arose for more men. It was impracticable to have active units to have a reserve unit of the same name, but under an arrangement volunteers from reserve units would be permitted to join active formations from the same province, and in some cases, from the same locality as their reserve unit. This plan of "matching up" every reserve unit with an active unit of the same territory would promote a spirit of provincial and local pride.

Col. Ralston said more than 50,000 men were now serving with the Royal Canadian Air Force. In raising the quota of about 35,000 for the next 12 months there would be no shortage of candidates for ground duties, while there was also a reserve of about 10,000 observers and gunners. Within a few months and every month thereafter there would be a growing demand for aircraft recruits.

At Montreal and most urgent need of the Royal Canadian Air Force was for radio technicians to operate the scientific warfare against air attack.

"We are looking for 2,500 Canadian men of common sense and ready this minute to volunteer for overseas service in a new service. I do not like to overstate the case, but I can say that it is of vital importance that we get these immediately, and that we get them immediately."

The age limit for radio technicians would be from 18 to 45 years.

"The British air ministry expects great things from this invention," the minister said. "The details of this work are of course secret, but I can say that in general terms it means that by using a great number of small radio sets of modern design, radio technicians posted at ground points all over the world, will be able to detect enemy aircraft in the air and direct anti-aircraft fire with deadly precision."

Mr. Macdonald said there had been some disappointment among many eager to join the Royal Canadian Navy, but for whom no place was available.

"Our policy has been and will continue to be one of expansion, and at the same time one of careful selection," he said.

Since the outbreak of war the Royal Canadian Navy had been expanded ten-fold, necessitating additional training space and many new instructors.

One of the most pressing needs of the Royal Canadian Navy was marine engineers, with at least three fourths class marine certificates. The immediate requirement was for 200 men in this classification.

There was also an urgent demand for 200 high-class motor mechanics, and openings for shipwrights and carpenters. Tradesmen in other categories would also be accepted and placed on a waiting list until such times as vacancies occurred.

Alr Marshall Bishop
Ottawa.—The Royal Canadian Air Force announced that Alr Marshall W. A. Bishop will take a leave from his post as commander of the Royal Canadian Air Force in London, Ontario, to become a member of commerce meeting this week.

Minister To Washington
Ottawa.—Lionel McCarthy, who has been acting Canadian minister to Washington, will be replaced by the minister, Loring Christie, becomes the permanent minister following Mr. Christie's death.

CHURCHILL ASKS FOR MORE SHIPS TO DEFEAT NAZIS

London.—Prime Minister Winston Churchill warned that Adolf Hitler's military war effort threatened to sink America's aid-to-Britain policy, and may explode at any moment in an attack on Britain's aid to Turkey and a thrust at Russian wheat granaries and oil fields. Whatever the events in the Balkans, in Africa—where he said that every Egypt may be threatened by Nazi panzer divisions—or elsewhere, Churchill declared the main theatre of war was the battle of the Atlantic.

"Everything," said Churchill, "turns on the battle of the Atlantic, which is proceeding with growing intensity on both sides."

He said that German submarines "not surface raiders are ranging ever farther westward toward American shores, seeking to sink America's aid to Britain." He declared that unless this menace is met and defeated "the life of Britain" will be threatened and "the purpose . . . to which the government and the people of the United States have devoted themselves will be frustrated."

Churchill said that only the full resources of America's shipbuilding industry would enable Britain to carry on full scale warfare into 1942 without the aid of American ships and surface raiders. He said that a disaster would ensue if the Germans succeeded in their attempt to send to the bottom America's much-needed war supplies.

The prime minister spoke in sombre and solemn tone. He was more grave than the House of Commons has seen him at any time since the collapse of France.

He said that Germany presents these menaces to Britain and the world:

1. The Battle of the Atlantic where British sea power is challenged.

2. The Balkans where Nazi panzer divisions reached the Aegean at Salonika, and are now in Turkey and at any moment attack Turkey and drive for the wheat fields of the Ukraine and the Caucasus oil fields.

Britain, itself, which at any moment may be invaded.

4. Africa, where only hard British fighting will prevent the recovery of all Cyrenaica and invasion of Egypt with the threat of the Suez lifeline which that implies.

Italy's Losses Heavy

Estimated Casualties In Africa And Ethiopia Now Total 283,195

London.—Italy's loss of the greater part of her army in the desert, and her 191,195 men, the ministry of information announced.

Italian casualties, including prisoners in Ethiopia, up to April 5 totalled 260,000; in Libya up to March 4 the number was 140,000. In the last 24 hours, the ministry said, in Italian Somaliland the total was 31,000, including one general.

British losses up to Feb. 23 were put at 2,900.

Italy lost 92,000 men in the Albanian fighting up to Feb. 3, which made a grand total of 283,195 in both war theatres, the ministry said.

Statement From De Gaulle

Possible That Free French Troops May Fight In Balkans

Alexandria, Egypt.—Gen. Charles De Gaulle, Free French leader, said the possible Free French troops will take part in the fighting in the Balkans.

"I have reason to hope that the Free French will take part in the battle of the Balkans," the general said in an interview, "and it is possible that I may go there."

Gen. De Gaulle, on an inspection tour of Free French units in the Middle East, predicted a formidable German effort but said he is convinced "Balkan countries which have chosen to resist will not regret it."

Alr Marshall Bishop

Ottawa.—The Royal Canadian Air Force announced that Alr Marshall W. A. Bishop will take a leave from his post as commander of the Royal Canadian Air Force in London, Ontario, to become a member of commerce meeting this week.

Minister To Washington

Ottawa.—Lionel McCarthy, who has been acting Canadian minister to Washington, will be replaced by the minister, Loring Christie, becomes the permanent minister following Mr. Christie's death.

Britain Controls Leather

And Supply For Shoes May Be Reduced This Fall
Ladies, here is a little inside information all to yourselves. Watch your step—or should I say your shoes?

Remember the old shoes in your wardrobe that you have been threatening to have repaired? Well, go to it now and get them done. Furthermore, the manufacturers will be worth their weight in the silver you would pay to buy new ones.

Leather for shoes (apart from the notes is already controlled. Rationing may come in the autumn.

Furthermore, shoe manufacturers are faced with the problem of losing a large portion of their skilled workers to armament factories.

Fabric sales are on their way, but the price will rise because good resilience demands a degree of silk in the material and that involves the 33½ per cent. purchase tax.

But don't lose hope. Shoe manufacturers are experimenting. There is weakness from Newfoundland; de-haired and re-grained it will look like morocco leather. India's "Kutti" is a special kind of cow-hide.

So take care. New leather shoes may soon be as rare as silk stockings.

Women operatives, who comprise a large proportion of the 16,000 workers in the Leicestershire factories, are going to have their say in the coming shoe "crisis."

The Minister of Labor considers that large numbers of them should be transferred from this "luxury" trade to armament.

Miss May Goodwin, president of the Leicester Women's branch of the National Union of Boot and Shoe Operatives, told me: "Our women are prepared to go into munitions. But to work every single woman now waiting her time in our factories, put first at a bench."—London Daily Sketch.

New Types of Aircraft

Sky Armada of Britain Being Improved All the Time

The Royal Air Force has more than 30 types of aircraft to form the sky armada with which Britain will conduct her future offensive in the air.

Among the latest additions are the Beau and the Halifax. The Beau is a fighter useful for long-range attacks and escort duties as well as for night fighting. The Halifax bomber, like the Stirling and the Manchester, can carry three times the weight of bombs over the same distance as predecessors, of which they are twice the size.

Authoritative circles say the R.A.F. now has, despite battle casualties and wear and tear, a greater number of machines than last August and has made greater strides than Germany.

Some estimates of German production have indicated that the Nazi Air Force has by now barely made good its enormous losses in Poland since Poland, losses that have been placed as high as 21,000.

Britain has produced "really big bombers" with only two engines—such as the Manchester—capable of greater speeds than the older, four-engine craft. One of five new engine types is less than six feet long, but develops "more horse-power than the Royal Scot," a famous passenger train.

Side by side with these new types produced by the united labors of scientist, designer and workman, march improvements in equipment for flying and fighting at great heights. Air battles at 30,000 feet mean that the pilot must be protected from the rarefied atmosphere and extreme cold. In to-day's air fields great strides have been made.

Had To Repeat Drill

So New Zealand Troops Gave Their General a Nickname

In the last war General Sir Alexander Godley, who at the age of 74 has just handed over his Home Guard platoon to a younger man, was affectionately known as "Do it again, Alec." It was the New Zealanders who gave him the nickname. The story runs that one hot day while they were on parade, Lady Godley was present. She so much admired their drill that, when they had finished, she called out to her husband, "Do it again, Alec." And much to the troops' disgust they had to!

Have-Much-In Common

The Kingston Whig-Standard says Hitler, Mussolini and Matsuka should get along famously together. They have so much in common. Hitler can't conquer Britain. Mussolini can't conquer Greece. Matsuka can't conquer China.

Poets who write about the beautiful snow don't have to shovel it.

Honey Production On The Prairies

Sweet Clover Is The Most Important Source Of Nectar

Bees have been kept at the Dominion Experimental Station at Scott, Saskatchewan, since 1922. For a number of years, it appeared that a few acres of sweet clover were necessary before bees could be expected to gather a profitable crop of nectar; but, more recently, there has been sufficient volunteer sweet clover on waste land and on roadsides in most districts to provide reasonable pasture for a few colonies. It is true that bees make use of many other flowers, but sweet clover is known to be the most important source of nectar on the open prairies, says E. Van Nieu, Dominion Experimental Station, Scott, Sask. In areas where bush land is common, the fireweed or steppes bush may provide a large part of the nectar for honey production, and although sweet clover is not always necessary in such areas, the crop prospects are greatly improved by its presence.

On the prairie, extremely dry weather at the time sweet clover is in bloom often results in almost a crop failure as far as nectar is concerned. Strong winds are also detrimental as they sometimes make it very difficult for the bees to gather nectar.

One basic principle in honey production sometimes overlooked is the importance of having a young prolific queen in the colony and the need for special attention to brood rearing from early spring to the time of the main honey flow. A beginner in beekeeping should be aware that the bulk of the nectar is gathered in a short time. At Scott, a strong colony standing on scales has on several occasions gathered over 15 pounds of nectar in one day.

If brood rearing has progressed satisfactorily, the hive will be filled with bees ready for the harvest but if the queen proves to be an indifferent layer and has to be replaced during the brood rearing season, valuable time will be lost. If brood rearing is slow, the hive will not be well filled with bees in time for the flow, and the colony cannot produce much honey even in an ideal season. No queen will lay well when stores in the hive are dwindling. If the food supply is low and nectar is scarce, it is wise to feed some sugar syrup, even molasses, rather than have irregular brood rearing. It is a good practice to replace old queens before the end of the main honey flow, if the colonies are to be wintered.

When starting with bees for the first time, free bees should be obtained from the Provincial Beekeepers' Association or the nearest experiment farm or university. It is well to begin with only one or two colonies and, if possible, visit an experienced beekeeper as problems arise.

Artists Will Convene

Three-Day Convention Of Canadian Artists To Be Held At Kingston

H. O. McCurry, National Gallery director, announced that a three-day conference of Canadian artists will be held at the National Gallery and at Queen's University, Kingston, Ont., starting June 26.

Mr. McCurry said the conference, first of its kind ever held, will be under joint auspices of the Gallery and Queen's University, with the collaboration of the Carnegie Foundation.

"Canada is on the verge of important developments, artistic as well as national," said Mr. McCurry. "A gathering of this kind is one step in preparation for the future."

United States critics will be invited to attend the conference.

Was Well Named

Sergeant-Major H. T. Brewer has generously and literally given his shirt to the York and Sunbury Historical Society. It's a "graveyard shirt" issued to him when he enlisted in the Royal Canadian Regiment at Fredericton in 1888. At the time every soldier received such a garment to be worn as a shroud at burial.

For every gallon of fuel consumed in an automobile engine, a gallon of water is discharged from the exhaust. Hydrogen in the fuel combines with oxygen in the air to make water, which is carried off after combustion takes place.

Taxes had not been levied in Orono, a parish in Sweden, for 47 years, but now they have taxes to relieve unemployment.

One person in every two hundred in England is named Smith, according to estimates.

BRITISH TANK OBJECT OF ADMIRATION

Engaged in rounding up "enemy" parachute troops who were supposed to have landed on the Downs, this British tank is the object of interest to village children when it stopped by the roadside during manoeuvres.

Mr. Winant Struck Oil

Story Of New Ambassador To Britain

The new American Ambassador has been reported to be a man of considerable wealth, but the story of how he acquired it is not generally known. It was actually the result of a wartime acquaintance.

When serving as a private in France, Mr. Winant happened to "bump" with another "doughboy" named Coyle, who turned out to have come from his own home town of Concord, New Hampshire. The two soon became close friends.

After the war Coyle tried his luck in the Texas oilfields and presently reported to his former fellow-campaigner that he had found a promising opportunity but needed capital to take advantage of it. Mr. Winant at once went to Texas to look into the situation, and after discussing it invested his spare cash in sharing the purchase of a lease.

The first well that was drilled proved to be a gusher, and other ventures in the same property were equally successful, so that the two partners were soon well off.—Manchester Guardian

Cost Of Searchlights

Britain Receives Large Orders For Projectors

A farthing an hour is the cost of throwing a 20,000 candle power beam from the portable searchlight projectors included in a large order received by Britain from Australia.

Other items in it are floodlight projectors, storm lanterns, portable radiators and more than 1,000 lamps, all of them burning ordinary paraffin at the rate of 1½ pints for ten hours.

Among other recent overseas deliveries from the same makers were a further 144 storm lanterns for South Africa.

In the last nine months of 1940 the value of their exports went up half as much as in the similar period of the year before.

According to the United States public health service, 90 per cent. of all persons in America suffer from some form of foot trouble.

Glass-making was known to the Egyptians more than five thousand years ago.

BRITISH KEEP ON THE ALERT WITH MANOEUVRES

A contingent of British troops are pictured carrying out war-like manoeuvres on one of the beaches on the south coast of England, in the exercises in which they practice dealing with a force of enemy troops assumed to have landed on British shores. In this way they keep themselves fit and accustomed to the technique of seashore fighting.

The Wool Clip

Large Amount Will Be Required For War Contracts

It will soon be sheep shearing time in Canada. As a large percentage of the 1941 Canadian wool clip will be used in war contracts it is important that Canadian wool be handled and marketed to best advantage, says A. A. MacMillan, Production Service, Dominion Department of Agriculture. All wool sold commercially will be graded according to the Canadian wool standards and in this way each grade will be used for the purpose for which it is best suited.

As Canadian wool of itself is equal to any produced elsewhere the following suggestions may be of value to Canadian sheep raisers at this season of the year:

1.—At lambing time avoid dropping straw and chaff on the ewes' backs while in the small lambing pens.

2.—Avoid allowing ewes to get dirty in wet, muddy yards or pens.

3.—During the spring break-up, keep pens as dry as possible.

Prove drainage from pens and yards.

4.—Prepare for shearing by making sure that the ewes can be penned in a clean place free from chaff and seeds.

5.—A clean shearing platform is essential.

6.—Ewes that are tagged at this season of the year are less likely to become dirty later on.

7.—Make arrangements for a supply of pen, twine, and wool scales, so that the fleeces can be properly rolled and tied at shearing time, and the wool well stored until sold.

The 1941 clip of fleece wool should make a valuable contribution to Canada's war effort and it is important that each fleece be kept clean, free from straw, seeds, chaff, burrs and tags and that it be marketed in good condition for grading and sale to Canadian mills that can use it to best advantage.

Really Small

So small is the filament of a 6-watt 115-volt lamp that only the best eyes can see it. It has a diameter of less than five one-thousandths of an inch. It would take 2,150 of these, laid side by side, to make an inch.

The shabtiest part of snow is some of the poetry it inspires.

Veracity is required of messenger boys in that section of the Canadian National Telegraphs which furnishes boys to carry out unusual commissions. Recently a Montreal suburban couple desired to attend a church service, but the presence of a young child and the absence of a maid presented problems to upset the plan until father thought of the messenger service. His telephone request was followed by the arrival of a smart lad who proved thoroughly capable of dealing with domestic matters while the parents went to church.

Mother: I can't understand why you are always fighting with Will Smith. I'm sure he has a very nice face.

Son: Well, he hasn't now.

Many Unusual Matters Are Handled By Telegraph Messenger Boys

Veracity is required of messenger boys in that section of the Canadian National Telegraphs which furnishes boys to carry out unusual commissions. Recently a Montreal suburban couple desired to attend a church service, but the presence of a young child and the absence of a maid presented problems to upset the plan until father thought of the messenger service. His telephone request was followed by the arrival of a smart lad who proved thoroughly capable of dealing with domestic matters while the parents went to church.

Mother: I can't understand why you are always fighting with Will Smith. I'm sure he has a very nice face.

Son: Well, he hasn't now.

Deacommunia is the art of transferring pictures from paper to other surfaces.

British Food Convoys

Queen Elizabeth Fronts Trucks To Serve Newly Bombed Areas

At a ceremony at Buckingham Palace in a recent week, Queen Elizabeth gave Lord Woolton, Food Minister, a fleet of eight trucks constituting one of eighteen convoys that this Ministry of Food will hold in reserve for bombed towns. The other seventeen convoys of the same number and type were given by the British War Relief Society of America, whose head, Bertram Cruger, was at the Palace to see the Queen turn over the trucks that she presented.

A convoy consists of a water truck with a capacity of 300 gallons; two trucks carrying 600 meals apiece, two heavy trucks with soup boilers and fuel, and three mobile canteens prepared to dispense tea and light refreshments. In addition five motor cyclists are attached to each convoy.

The idea is that the convoys will go to the areas of London and areas, such as Coventry, and replace the cooking and feeding facilities that have been knocked out by German bombers.

When Lord Woolton first suggested the idea the Queen took it up at once. "I am sure," she said, "that a convoy, which costs about £5,000, Mr. Cruger wanted to supply all the needs of the people of the area."

"The message which I would entrust to these convoys will not be one of encouragement, for courage is never lacking in the people of this country," the Queen said. "It will rather be one of true sympathy and of loving kindness. It is with that message that I am sending you the trucks today."

These trucks will be known as "Queen's messengers" and will be manned by the Women's Voluntary Services. They will serve a meal of vegetable stew, tea, bread and margarine.

Empire Can Fill Demand

Furs Are Finest That Can Be Produced Anywhere

"Buy Empire" is the slogan of the British Fur Industry, and it will be repeated by the Women's Voluntary Services. They will serve a meal of vegetable stew, tea, bread and margarine.

These trucks will be known as "Queen's messengers" and will be manned by the Women's Voluntary Services. They will serve a meal of vegetable stew, tea, bread and margarine.

DAUGHTER OF DESTINY

—BY—

Eleanor Aitbury Colton

CHAPTER II—Continued

Wong led the way around a curved hallway, past handsomely furnished bedrooms. His padded slippers made no sound on the polished floor. Only the click of her own heels as they made a little procession of two through the deserted hallway. Finally, Wong entered one of the rooms, set down her luggage.

"Will there be anything else, Miss?" His slanting Oriental eyes studied her coolly, his yellow face impassive, inscrutable.

Still, Devona sensed the strange antagonism. As if he'd resented her coming.

"No, that's all, thank you," she said abruptly.

"Very good, Miss." He bobbed that stiff little bow at her again before he closed the door behind him.

Annoyed, Devona tried to shrug off the ridiculous feeling of cold horror. It was something like the sensation she'd known once when a deadly cobra raised its hooded head out of her bathtub.

But that—she mistook a little chuckle—was far away India. This was California and Wong was undoubtedly only a very young, well-trained servant. Her strange life eyspasing into far places had made her super-sensitive. She must remember that she was no longer a girl trying where danger, often swift, silent, horrible death, lurked around every corner.

There could certainly be no danger lurking in this beautiful place. She glanced around the lovely room. Her room. Her very own. Cool blue drapes against soft sandy walls, rich carved oaken chest that might have come directly from an old Mission chapel. The whole like a lovely picture.

And beyond, a startlingly blue bathroom with square fawn and apity searings yawning from the mosaic of tile on the walls.

From a long window opening onto a grilled iron balcony, she looked down into a garden. A fountain splashed coolly somewhere in the shadows. For a moment she had expected some handsome, gallant fellow—some Jose Matias, guitar in hand—to serenade her from the flagstoned patio.

Like a story book or a movie set she looked coolly somewhere in the shadows. For a moment she had expected some handsome, gallant fellow—some Jose Matias, guitar in hand—to serenade her from the flagstoned patio.

SHE NEARLY RUINED THE STORE

I'VE TOLD YOU TWICE WE HAVEN'T THAT COLOUR...ARE YOU DEAF?

WHY...WHY...YOU ...IMPERTINENT!

I OVERHEARD THAT MISS JONES...WHAT HAS COME OVER YOU THESE DAYS...YOU'RE TOO IRRITABLE FOR A SALESMAN!

I'M SORRY...BUT MY NERVELESS SO BAD...I ONLY WANTED COFFEE FOR BREAKFAST...

I THINK THAT'S YOUR PROBLEM...TOO MUCH COFFEE AND TEA...YOU'VE GOT CAFFEINE NERVES...BETTER SWITCH TO POSTUM WHILE WE STILL HAVE SOME CUSTOMERS LEFT

THANKS FOR THE BONUS AREN'T...BUT REALLY I SHOULD THANK POSTUM FOR MY INCREASED SALES...I FEEL SO MUCH BETTER NOW

A MONEY-SAVING HOT BEVERAGE

Delicious instant Postum is particularly economical because the price per cup is low and there is no waste. Easily free from any caffeine effect on nerves, stomach or heart. Try it for 30 days and see how much better you feel!

WHEN THEY DRINK POSTUM, I'M THROUGHT

"Time enough when you're grown up," he'd always say, and pinch her ear affectionately.

Grown up? Devona pouted slowly. Her hair piled into a cluster of satiny curls on top of her head, her clear white skin catching the rich glow from the wine-red velvet dinner gown, she was grown up now, certainly. The dress itself was as simple and as subtle as the skill of a famous French couturier could make it. And as costly as the Shanghai merchant had dared.

But—she decided now—it had been worth it. Soft shirrings that slyly cupped her breast, long all-silhouette lines that followed the lithe-ness of her slim figure. No one could call her "little school girl" now!

"Was there anything else, Senator?" The girl hesitated at the door.

"No, thank you."

"May I say, Senator," the little maid added with a shy little smile, "I hope you will be very happy here."

"I'm sure I will, Margarita," and when she'd slipped silently away, Devona buried her face in her hands and murmured a little prayer of thanks to the kindly destiny that was making everything so "unbelievably perfect."

The sound of voices in the hallway, some woman's lovely, low-voiced laughter, jerked Devona erect again. That must be her mother. Instinctively—instinctively—she was sure of it. No one but a beautiful woman would laugh like that. And suddenly Devona was shivering.

The footsteps came to her door. Some one knocked.

Breathless, Devona managed "Come."

Breathless, Devona managed "Come."

mother thought she wasn't really glad to be here.

"Did you? How nice," Vars opened a huge handbag, took a cigarette from a gold monogrammed case. "When did you arrive?"

"About an hour ago. Your maid was so kind about helping me unpack, dress. I'm so thrilled to be here and—" she began impulsively. Then, through a cloud of smoke, she saw the cool smile in her mother's eyes—and so grateful for everything she finished lamely.

"Are you? You look very nice," Vars selected the word, "—French. And you'll no doubt amaze my guests about it. You're so elaborately formal here, you know."

"I'm sorry, Mother," Devona's hand flew to the fastening of a pretty red velvet. "Shall I change something else—"

"Oh, never mind. As long as you're all dressed up, wear it," Vars smiled caressingly. "Later, when we've had time to make plans for your stay, I'll make more appropriate selections."

Cheeks scorching, Devona blinked back tears. "Yes, please don't," Vars smiled at her cigarette.

"By the way, these don't call me 'mother.' Most of my friends don't know you. And none of my friends. Besides," her lovely lips twisted into a little grimace, "hear you say that makes me feel so antique. Call me Vars, instead."

"Yes—Vars."

Vars smiled then—a lovely smile but somehow it never reached her eyes. "Run along downstairs now and show off your smart gown. I'll join you."

(To Be Continued)

A Valuable Weed

Common Horsetail Best Agency For Finding Gold In Ground

A weed which grows profusely in Canada and the United States—the common horsetail—"is the best agency yet discovered for finding gold in the ground."

At a recent meeting of the American Institute of Mining and Metallurgical Engineers, Dr. Hans Lundberg, Toronto geophysicist, told the story of the horsetail as a gold miner.

Dr. Lundberg said that many plants growing over ore bodies extract metal from the ground. "The horsetail, however, is the most efficient miner of the lot."

The chief value of the discovery, said Dr. Lundberg, lies in the use of the horsetail to locate gold deposits. However, it is conceivable that in an area where the gold deposit is thin—too thin to mine—the horsetail could be planted and would extract the precious metal.

Horsetail can accumulate a gold content that assays four or half ounces to the ton of horsetail. Dr. Lundberg said—Toronto Star Weekly.

A Much Used Word

The word "hello" is spoken 175 times a day by the average student, according to an Alfred University survey. The survey reveals some girls give the word as many as 350 times on warm spring or summer days. The average, however, is brought down by some of the timid youth who recognize a passivity only when necessary.

The Japanese think the fate of China is still in doubt. The Chinese don't.

Interesting To Tourists

Legend Of Nova Scotia's Maiden Cave Is Very Old

Undimmed by the ages, the famous legend of "Maiden Cave" is interesting to tourists who flock to Nova Scotia to enjoy her far-flung beauty, romance and tradition.

"Maiden Cave" is at Black Point, near Parbroboro. It is related that two centuries ago, an Italian pirate, captured a British vessel with rich cargo and made all but the captain's daughter, who was extremely beautiful, walk the plank.

A great storm then drove the pirate from his course and he arrived at the bay of Fundy, landing at Black Point.

The beach seemed littered with jewels and each of the pirates gathered a treasure of unmetals. The pirate captain, unable to subdue his fair captive, abandoned her. She was placed in a cave on the shore, a quantity of fish known as pollock thrown in beside her, and the cave sealed with stone.

Later, strange wailing cries from the cave frightened away Indians passing by but later some of the bolder ones investigated, opened the cave and found the skeleton of the girl beside a heap of fish bones. The French knew the spot as "Pollock Cave" and it was claimed by them that at certain periods of the year the weird cries of the unfortunate girl could still be heard.

The legend of "Maiden Cave" survives to this day.

England's 1940 home-grown beet sugar supply is equal to 23 pounds of white sugar per head of the population.

Great delicacies in China are cooked in bamboo shoots, sharded in the beche-de-mer—a species of sea slug.

Earned His Decoration

Fifteen - Year - Old Boy Youngest Holder Of George Medal

John Cain, 15, who weighed two and one half pounds at birth and spent the first six months of his life in a bath of olive oil, is the youngest holder of the George Medal for gallantry.

When a bomb set a big factory afire near his home in London, Cain knew that many persons were sheltering in the cellar and he led four policemen through the blaze past barrels of inflammable paint and falling live wires to the rescue.

Part of the basement ceiling already had collapsed and paint was several inches deep on the floor. The rescuers became saturated with paint and smoke and heat drove them back several times before they managed to carry all survivors from the shelter, using planks and broken doors for stretchers.

The policemen also got George Medals.

GEMS OF THOUGHT

BENEFACTION

Let us not be weary in well doing: for in the season we shall reap, if we faint not.—New Testament: Galatians 6:9.

Doing good is the only certainly happy action of a man's life.—Sir Philip Sidney.

We should give as we would receive, cheerfully, quickly, and without hesitation, for there is no grace in a benefit that sticks to the fingers.—Seneca.

To disregard the welfare of others is contrary to the law of God; therefore it deteriorates one's ability to do good, to benefit himself and mankind.—Mary Baker Eddy.

If you confer a benefit never remember it: if you receive one, never forget it.—Chilon.

Give if thou canst in alms; if thou, afford Instead of giving, a sweet and gentle word.—Herrick.

Give if thou canst in alms; if thou, afford Instead of giving, a sweet and gentle word.—Herrick.

Give if thou canst in alms; if thou, afford Instead of giving, a sweet and gentle word.—Herrick.

Give if thou canst in alms; if thou, afford Instead of giving, a sweet and gentle word.—Herrick.

Give if thou canst in alms; if thou, afford Instead of giving, a sweet and gentle word.—Herrick.

The Fireless Locomotive

Is Clean And Easily Operated But Has Its Limitations

The fireless steam locomotive is a very simple machine. It carries a tank of hot water which supplies steam to a conventional engine. No fire box, no fuel, no boiler tubes are required. The tank is charged with steam from a power-plant boiler and provides several hours of normal service before recharging is necessary. The engine, easily operated by one man, is clean and quiet. For certain applications it possesses definite advantages of economy and safety over the steam locomotive with a fire boiler. For example, the fireless locomotive has lower first cost; requires less in repairs and upkeep; makes possible greater economy of fuel, which is burned in a stationary power plant, and has no fire hazard even in flammable atmosphere. While standing, it wastes almost less energy than does a fire engine. Limitations in the use of it are the necessity for access to a steam boiler and the fact that only rather short hauls may be undertaken between trips to the boiler. Typical applications are freight switching, industrial plants and coal haulage in mines.—Technology Review.

A Wartily Endorser

Senator Claude Pepper, who recently visited Canada, said he is working on a scheme to utilize the Canadian and American dollars, thus relieving Canada of a severe financial burden in paying war costs in the United States.

The reindeer herd at the mouth of the Mackenzie River now numbers over 5,000 and supplies the Eskimo with much food and clothing. This is a case of imported stock taking kindly to their new home.

New glass which can be cut with sharp knife but will not break, only tearing like a piece of cloth has been introduced into London.

WORLD WEEK

(Continued from front page)

Japan, too, has stepped into the limelight again as the consequences of the new Russo-Japanese pact become more clear.

The Japanese foreign minister, as you will remember, was in Berlin when the Yugoslavian defiance quite definitely lowered German prestige. Talking advantage of this diplomatic defeat, Youse Matsuzaki demanded a higher price for Japanese co-operation with the Axis.

The pact with Russia was that higher price. Stalin signed, not because he was afraid of Japanese aggression in the Pacific, but because he was afraid of German aggression in the Ukraine. He feared to offend Hitler by refusing to sign.

This treaty, however, assures Japan that she will proceed in harmony with her program of expansion in the East Indies, the Malay States, and southeast Singapore without fearing Russian interference.

It is not likely that this threat of interference was very great at any time. But the Japanese are a jittery people. They like to play safe.

It is reasonable to believe, therefore, that war is nearer to the Pacific than it has been since September 1939.

A further expansion of hostilities is seen in the American situation. Obviously, the loan-pled bill falls down in its intent so long as American-made supplies and munitions run the very real risk of being sent to the bottom of the Atlantic.

No matter what political opposition is being brought against the employment of American convicts, realistic thinking will eventually demand the safe conduct of American goods to Britain as the only way in which the loan-pled bill can be properly implemented.

American convoys will mean a clash between German and American warships. Such a clash will mean war.

Another ineliminable situation is growing up in regard to the United States' proposal to establish air bases on Greenland. An agreement was recently signed between the Danish minister to Washington and the U.S. State department giving the United States the right to partially occupy that Dan-

Snicklefritz

Every time we see a picture of a beautiful home set in a beautifully landscaped grounds and feel that we want to spend the rest of our days there, it turns out to be a funeral home.

At every meal where any number of people are gathered together for a feed there is always somebody foolish enough to think he can eat his piece of chicken with the aid of a knife and fork.

Truth is mighty. The scientist was giving a lecture, and asked a student to name a poisonous substance.

The announcement was "Intense" when the student replied, "Aviation, sir."

"Come, come," said the scientist: "This is no time for hilarity. What do you mean?"

"Well, sir, one drop will kill," was the naive reply.

Julia: Do you think it's unlucky to postpone a wedding?

Frank: Not if you keep on doing it.

ish colony.

Now Berlin is objecting strenuously to Nazi compulsion. The Danish government has dismissed its minister to Washington and repudiated the agreement. But the United States cannot completely draw back because she has formally declared Greenland to be part of the Western Hemisphere and therefore within the scope of the Monroe Doctrine.

The Greenland project has moved from the status of a military expedient to the status of high American policy.

Hitler had planned to use Greenland as a base from which to attack North America. The United States may have to fight to prevent it.

The Carbon Chronicle invites its readers to listen to **The Saturday Night Review** broadcast by Harold L. Weir over station CHRN (1260k) every Saturday night at 8 o'clock.

"THIS IS NO PART-TIME JOB"

Quoted by President Roosevelt
In radio address, March 15, '41

The President in his radio address warned the American people, that, a half-hearted effort on their part would lead to failure and urged an all-out effort.

To us Canadians "AN ALL-OUT EFFORT" on our part is even more urgent. We must **WORK full time** and **SAVE TO LEND** full time for victory now and security after.

**Keep on Buying
WAR SAVINGS
CERTIFICATES**

Space donated by the
BREWING INDUSTRY OF ALBERTA

One of our forests, by rail and river, come millions of logs to plants manufacturing pulp, newsprint and lumber for houses, furniture and a thousand other useful products. Labour and capital together have made Canadian FORESTRY the greatest of our export manufacturing industries.

The Bank of Montreal co-operates by furnishing business men in all branches of the industry with the specialized types of banking service they require. Many thousands of workers in these plants have their savings or checking accounts with us, or borrow for personal needs.

Serving Canadians and their industries in every section of the community, we invite you to discuss YOUR banking requirements with us.

MODERN, EXPERIENCED BANKING SERVICE — the Outcome of 125 Years' Success

**GRAIN DELIVERY QUOTAS
REMOVED AND FARMERS
CAN DELIVER ALL GRAIN**

According to an announcement Saturday by the Hon. Jas. A. MacKinnon, minister of trade and commerce, quotas on delivery of grain are to be removed, effective Monday, April 22nd. This means that farmers can now deliver all of their 1940 crop where storage space at elevators is available.

Opening of navigation on the Great Lakes and movement of wheat from the lakehead is said to be responsible for the lifting of the quota.

**DON'T JUST ASK FOR BREAD!
— INSIST ON —
CARBON-MADE BREAD
WHEN MAKING YOUR PURCHASES.
DICK'S BAKERY**

Boys and girls are encouraged to ask questions in Canadian schools. They are not forced to accept false principles and theories without challenge.

This is the freedom of democracy ... the freedom we are fighting to maintain. What a difference this from the fetters that a Nazi victory would impose on Canada ... and on the world!

So ... you who want your children to be educated in schools where freedom of thought and action is allowed and encouraged ... do your part to help to win the war.

Keep up YOUR PLEDGE! ... Increase Your Regular Investments in WAR SAVINGS CERTIFICATES

Remember—when Victory is won your dollars come back to you with compound interest. The more you save and lend, the better for Canada as you THEM.
